

M.Sc Computer Science

Course Outcomes (CO)

- 1.CO1:** Apply theoretical and practical knowledge of computer science to solve technical problems.
- 2.CO2:** Analyze, design, and implement efficient software systems.
- 3.CO3:** Utilize programming skills and modern software tools for application development.
- 4.CO4:** Communicate technical concepts clearly and effectively.
- 5.CO5:** Integrate ethical principles and social responsibilities in computing practices.

Programme Outcomes (PO)

1.PO1: Problem Solving Skill

Apply advanced computing concepts and algorithms to solve complex real-world problems.

2.PO2: Decision Making Skill

Develop analytical and critical thinking for data-driven decision-making in computer science applications.

3.PO3: Ethical Value

Uphold ethical, legal, and professional standards in the use of technology.

4.PO4: Communication Skill

Communicate effectively on computing activities with peers, users, and society.

5.PO5: Individual and Team Leadership

Demonstrate leadership qualities and work effectively as an individual or as a team member to achieve common goals.

6.PO6: Employability Skill

Acquire modern tools and techniques to enhance employability in a competitive IT environment.

7.PO7: Entrepreneurial Skill

Gain the ability to innovate and develop IT-based solutions, fostering entrepreneurial initiatives.

8.PO8: Contribution to Society

Use computing knowledge for the betterment of society and to address social issues.

9.PO9: Multicultural Competence

Respect diverse cultures and practices, and develop a global outlook in computing projects.

10.PO10: Moral and Ethical Awareness

Apply moral and ethical principles in all professional and personal endeavors.

Programme Specific Outcomes (PSO)

PSO1: Design, develop, and test software solutions for complex computational problems.

PSO2: Apply domain-specific knowledge in areas like data science, artificial intelligence, and cloud computing.

PSO3: Use advanced programming and analytical tools to build innovative applications.

Programme Educational Objectives (PEO)

PEO1: Become competent professionals in computer science, ready for industry, teaching, or research.

PEO2: Engage in continuous learning to adapt to evolving technologies.

PEO3: Contribute responsibly to the profession and society by adhering to ethical practices.
